Security Report

The following report is an extract of the last security test performed.
The below security point scores are only indicative and were automatically calculated by the tool and were not manually audited by our team.

Please visit help.flusk.eu for more details about the covered security points.

Application
test-privacy-456

Application ID
test-privacy-456

Test Date
May 16, 2023

Overall Status
Secured

All of the potential vulnerabilities of this app were resolved and appropriately secured.
Some issues (3) were ignored or marked as false-positive.

● Unresolved   ● Ignored   ● Secured

Tested Versions
- test
- live

The following security points were audited during the test.
- Data Leak
- Page access protection
- Clear data in login workflow
- Temporary password vulnerability
- Public Editor
- Unapproved collaborator
- Swagger file
- Password policy
- API Workflow protection
- Privacy rules definition
- Public sensitive fields
- Bubble API Token
- Visible URL in API call
- Public sensitive parameter in API call
- Test version protection
- Default username / password combination
- Unsafe Google Maps API token

Security Score Detail

✔	**global**	4 / 4
✔	**page**	1 / 1
✔	**database**	6 / 6
✔	**api**	1 / 1

Security Report

Ignored Issues (3)

The following issues were ignored or manually marked as false-positive

swagger	Criticality 2/3
On global scope.	

password_policy	Criticality 2/3
On global scope.	

compromised_login	Criticality 3/3
On page scope.	

Security Certificate

This certificate hereby attests that the application identified as "test-privacy-456" with the application ID: *test-privacy-456* has undergone a comprehensive security examination by the Flusk Vault software on the May 16, 2023. The results of the test have been produced by our automated system, ensuring a thorough and unbiased examination.

As per the security assessment conducted, "test-privacy-456" has been found to be secured as per the security points encompassed by Flusk Vault's automated testing system. This verification is based on the current status of the application at the time of testing and does not account for or guarantee the security of any modifications made post the date of the test.

This certificate is a result of an automated process and does not replace or replicate a comprehensive human audit. Any changes made to the app following the date of this certificate can potentially compromise its veracity and Flusk is not liable for any security issues arising from such changes.

During the testing process, 3 potential vulnerabilities were flagged by the automated system but were subsequently dismissed by the audit provider as false positives. These issues were not subject to secondary review by Flusk. Detailed information about these ignored issues can be found on the designated page linked to this certificate.

This certificate is issued solely for the purpose of attesting the security status of the specified application as of the date of testing, and does not imply any ongoing guarantee or warranty of the application's security status.

By issuing this certificate, Flusk affirms the security of "test-privacy-456" (Application ID: test-privacy-456) as at the May 16, 2023 to the best of its knowledge and within the scope of its automated testing system.

May 16, 2023,

Victor Nihoul
